Capacitors

Here you will find a vast selection of capacitors suiting a wide variety of applications, including various types of ceramic, electrolytic, RF, film, polymer and tantalum capacitors, as well as supercapacitors.

Capacitors are vital passive components that are found in almost all electronic equipment used today. They are used to store energy electrostatically in an electric field. Typical applications include tuned circuits, power supply smoothing, RF coupling, audio crossovers and many others.

Farnell element14 offers customers a comprehensive range of capacitors from the world's leading manufacturers including AVX, KEMET, Vishay, Panasonic and Multicomp.

Choosing the right packaging made **FASTER**

The Jameco Difference

Jameco has been in business for over
40 years and carries over 50,000
semiconductors, passives,
interconnects, electromechanical,
power supplies, LEDs and other
popular electronic components.

On-line catalogs and directories

ThomasNET

A comprehensive directory of industrial suppliers. Look here to find sources for almost anything!

GLOBALSPEC

An "engineering search engine". It is similar to ThomasNET, and is useful to help find vendors and catalog items.

SKF : An excellent interactive engineering catalog for bearing (rodamientos) selection.

Stock Drive Components/Sterling Instruments : A comprehensive on-line catalog of mechanical components. You can download 3D CAD models to use in your CAD assembly.

McMaster-Carr

Over 465,000 products, the website is easily searchable with full technical specifications.

Data sheets for over 100,000 metals, plastics, ceramics, and composites.

MatWeb, Your Source for Materials Information

What is MatWeb? MatWeb's [searchable database of material properties](#) includes data sheets of thermoplastic and thermoset polymers such as ABS, nylon, polycarbonate, polyester, polyethylene and polypropylene; metals such as aluminum, cobalt, copper, lead, magnesium, nickel, steel, superalloys, titanium and zinc alloys; ceramics; plus semiconductors, fibers, and other engineering materials.

[Benefits of registering with MatWeb](#)

Premium membership Feature: - Material data exports into CAD/FEA Programs including:
